

I was born on 21.02.1953 in Uskudar, Istanbul.

I studied in primary, secondary, high school and High School in Istanbul, I am a student at Anadolu University School of Photography and Cameraman, which I entered in 2019. Photography goes to my love and curiosity until 1973, and I devoted a lot of time, including my darkroom work, on the photograph that existed in black and white in those years. Later, I shot color photographs, slides and slides within the historical development.

Now I'm trying to make as many improvements as I can on the computer and shoot with digital cameras where photo history comes from.

Although I did a very short sports news photography in 1977, I quit reporter because I did not have much fun in those years, I attended both Football and Basketball Federation courses and got Referee License in both branches and managed many league matches.

I continue this hobby and my love of photography, which I have never stopped until today, as a member of Fethiye Photography and Cinema Art Association in Mugla Fethiye, where I still live, and I will continue as long as I can.
